MANISH KUMAR

DATA SCIENTIST | MACHINE LEARNING ENGINEER

+91 7456861606 • manish8755026341@gmail.com • github.com/DEVELOPER-MANISH007

PROFESSIONAL SUMMARY

Data Science and Machine Learning practitioner with a strong foundation in Python, SQL, and statistics, skilled in building end-to-end ML pipelines through data cleaning, EDA, and model evaluation. Practical experience applying NLP and recommendation techniques, backed by a MERN full-stack foundation for building and deploying ML applications.

TECHNICAL SKILLS

PROGRAMMING Python • SQL • JavaScript

DATA SCIENCE Pandas • NumPy • Data Cleaning • EDA • **Statistics** • Data Visualization

MACHINE LEARNING Scikit-learn • Regression • Classification • Clustering • Feature Engineering • Model Evaluation • Cross-Validation • Hyperparameter Tuning

NLP Text Preprocessing • TF-IDF • Sentiment Analysis

VISUALIZATION Matplotlib • Seaborn

WEB / FULL-STACK MongoDB • Express.js • React.js • Node.js

ML APPLICATIONS Streamlit • FastAPI

TOOLS Git • GitHub • VS Code • Jupyter Notebook

PROJECTS

AutoML Studio v2 — 2026

Python, Machine Learning, FastAPI, Next.js, Streamlit

- Built an AI-powered automated ML platform for preprocessing, EDA, model training, evaluation, and prediction workflows.
- Engineered a FastAPI backend integrated with a Next.js frontend for dynamic, deployment-oriented prediction workflows.

MLCompare — 2026

Python, Scikit-learn, Pandas, Statistics

- Developed a reusable Python package for automated comparison of classification and regression models.
- Implemented a standardized evaluation workflow to benchmark multiple models on consistent metrics.

Movie Recommendation System — 2025

Python, Machine Learning, TMDB API, Streamlit

- Built a content-based recommendation application using cosine similarity on processed movie metadata.
- Integrated the TMDB API and deployed with Streamlit for real-time recommendations, posters, and details.

IMDB Sentiment Analysis — 2024

Python, Scikit-learn, NLP, TF-IDF

- Applied TF-IDF vectorization and text preprocessing to classify sentiment across 50,000 IMDB reviews.
- Trained and evaluated Scikit-learn classification models to distinguish positive and negative sentiment.

PyML Snippets — 2026

Python, VS Code Extension API, Data Science, Machine Learning

- Developed a VS Code extension offering 42+ reusable snippets for Python, Data Science, and Machine Learning workflows, including EDA, preprocessing, and visualization.
- Implemented productivity-focused snippets for common ML tasks such as train/test splitting, pipelines, GridSearchCV, and classification/regression models.

EDUCATION

B.Tech, Computer Science & Engineering | AIMT, Greater Noida | CGPA: 7.5 2023 – 2027

CERTIFICATIONS

Data Science: The Ultimate Job Ready Data Science Course — Code With Harry
Programming: Complete Python Mastery — Code With Harry
Backend Development: Advanced Backend Development — Sheryansh Coding School

Additional: Typing Speed — 106 WPM
